DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on January 19, 2010, which has been fully considered in this action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Merkel et al.

Merkel et al discloses a method for dispensing a liquid material as an attenuated continuous stream 20 from a nozzle 16 having a liquid discharge outlet 22 for discharging a liquid material and air outlets for discharging streams 24 of pressurized air toward the dispensing liquid material; and varying the pressure of the pressurized air while dispensing the liquid material to cause the liquid material to move in a desired swirling pattern as the attenuated continuous stream, see column 6, lines 14-24 and claims 11 and 16.

Allowable Subject Matter

4. Claims 1, 2, 4-11 and 13 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claim 14 have been considered but are moot in view of the new ground(s) of rejection.
